BRONTO SKYLIFT

Safety above all

Bronto Skylift F-SE range

SUPER EXTINGUISHERS FOR INDUSTRIAL FIRE FIGHTING

Ready for duty with a multi-purpose unit

Bronto Skylift Super Extinguishers are specially designed for the extreme needs of industrial fire brigades. The presence of hazardous material and the intensity of fires requires fast response with high water discharge capacity. The increased horizontal outreach, an excellent up-and-over reach, an extensive water discharge up to 12 000 l/min and various options enable safe operations in demanding industrial environments.

SE range key features

- Unmatched extinguishing capability
- Water capacity of 6,000 l/min (up to 12,000 l/min as an option)
- Can be equipped with a fully-automatic foam system and a foam tank with a capacity up to 4500 liters
- Wide-ranging water and foam throw, also powder systems available
- Can be equipped with any suitable, high capacity fire pump
- User friendly Bronto+ control system
- Modern service tools and a wide service network

Customizable configuration

In addition to safety, our industrial fire solutions are strongly based on a multi-functional usability principle.

All of our concepts are designed to enable flexible modification and customization according to the tasks at hand. By manufacturing the products in-house, we make sure that they serve your specific needs to the very last detail. This also guarantees that the aerial platforms can adapt smoothly to your own procedures, systems and standards. The machines are designed to fit multiple standards and can be mounted on different chassis and equipped with fire pumps that meet your purposes. The optional features also include various foam mixing systems, radio remote controls and remote controlled cameras for extended surveillance capability.

Various options

- Breathing air, electricity and hydraulics in the cage
- Remote control for boom movements and water monitor
- Emergency back-up system
- Detachable winches
- Stretcher carrier
- High voltage detector
- Ultrasonic collision guard
- Various working lights and camera options
- Laser Rangefinder
- Bronto Loadman to measure ground bearing

Services for added safety and efficiency

For optimal performance and your safety, it pays off to take the best possible care of your Bronto platform.

The widest service network in the industry keeps you backed up wherever you are. With a Bronto Service agreement, you can be assured that your Bronto equipment is kept in the best possible shape for its entire lifetime. The content of the mutual agreement can be fully customised according to your needs. It can cover the annual inspections and service visits, but it can also include more detailed inspections, other maintenance activities and spare parts.

When the emergency arises, confidence in operator skills is crucial. For your teams safety our IPAF-certified field engineers provide operator and maintenance training for all new units. Content, location and the depth of the training can be tailored and additional training is always available where ever you need it.

Bronto One

Do you want to use your data to make knowledge-based business decisions? Bronto One, a new service, gives you a full visual overview of your resources, performance and abilities. You can always access the information you need, right when you need it.

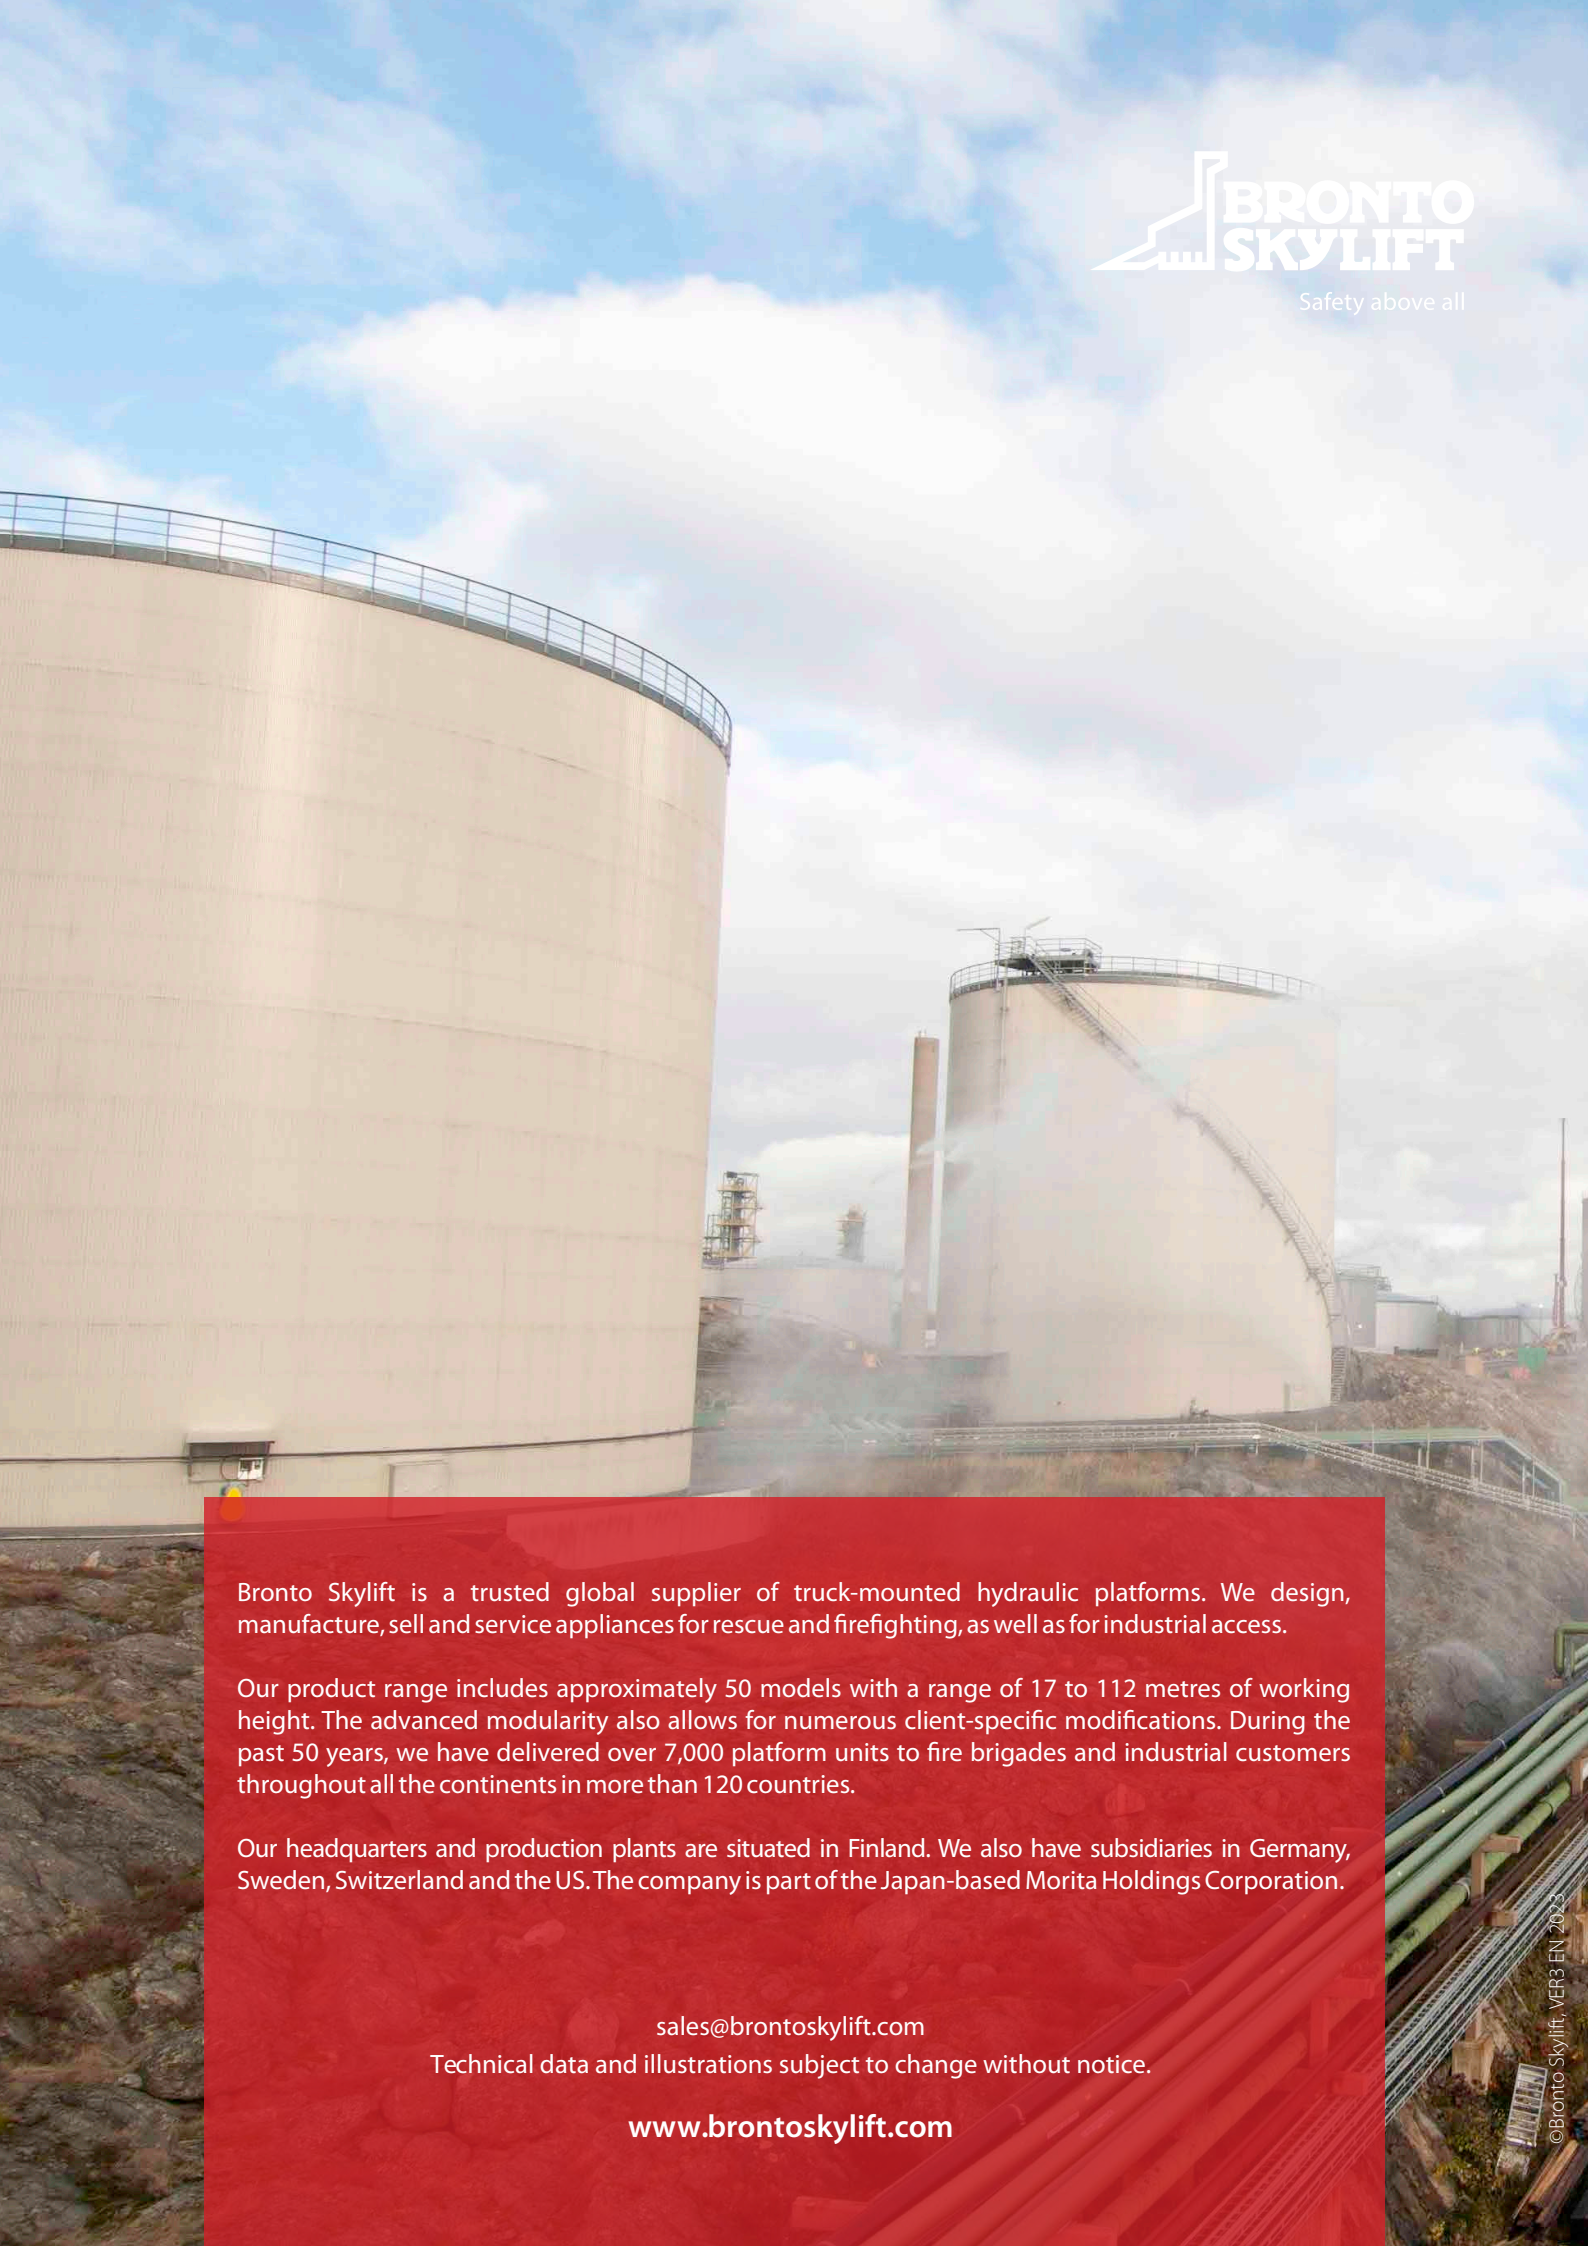
All Bronto aerials equipped with a modem are fully connected to Bronto One. However, fleets often include other types of equipment, and having only one manufacturer's unit in your fleet management system is like trying to complete a puzzle without all the pieces.

Bronto One welcomes every manufacturer's units and equipment, so it really does provide a full picture of your fleet. As Bronto One has an open interface, it can also be easily integrated with other systems.

Bronto+ control system takes care of you

Safety is about creating a safer working environment. An advanced Bronto+ control system increases the safety on your worksites by letting you focus on the job at hand.

- Easy and ergonomic
- Precise, stable movementsand extremely reliable outreach
- Automatic selection of the maximum allowed outreach in every direction based on the set up and cage load
- Bronto+ displays with touch screens and tailorable menus
- Integrated help texts, quick manuals and detailed failure codes help you in all situations



Safety above all

Bronto Skylift is a trusted global supplier of truck-mounted hydraulic platforms. We design, manufacture, sell and service appliances for rescue and firefighting, as well as for industrial access.

Our product range includes approximately 50 models with a range of 17 to 112 metres of working height. The advanced modularity also allows for numerous client-specific modifications. During the past 50 years, we have delivered over 7,000 platform units to fire brigades and industrial customers throughout all the continents in more than 120 countries.

Our headquarters and production plants are situated in Finland. We also have subsidiaries in Germany, Sweden, Switzerland and the US. The company is part of the Japan-based Morita Holdings Corporation.
